Summary

Former high school mathematics teacher transitioning into data analysis, with an independent portfolio of SQL and Python projects completed over the past year.

Experience

Mathematics Teacher, Cedar Grove High School -- 2016 to 2024

- Taught algebra, statistics, and AP Calculus to approximately 120 students per year.
- Built a spreadsheet-based grade analysis tool used by 8 other teachers in the department to identify students at risk of failing before progress reports were due.
- Redesigned the statistics unit's final project around a real dataset, raising the department's average unit score from 74% to 86% over two years.
- Served as department chair for 3 years, managing a \$12,000 annual supply budget.

Data Analytics Certificate Projects, Self-Directed -- 2023 to 2024

- Built a SQL pipeline analyzing 5 years of local school attendance data, identifying a 3-week window each year with a 22% spike in absences.
- Completed a Python and pandas project modeling enrollment trends across 9 local districts using publicly available state data.

Education

B.S. Mathematics, Ohio Valley University -- 2016

Data Analytics Certificate, Online Program -- 2024

Skills

SQL, Python, pandas, Excel, statistics, classroom data tools
