

Jordan Ellis

Senior Software Engineer | jordan.ellis.demo@example.com | (555) 010-4471 | Denver, CO

Summary

Senior backend engineer with 9 years building high-throughput payment systems. Led the migration of Northwind Payments' settlement pipeline to an event-driven architecture, cutting processing latency by 71% and reducing on-call incidents by half.

Experience

Staff Software Engineer, Northwind Payments -- 2021 to Present

- Redesigned the settlement pipeline from a nightly batch job to an event-driven stream, reducing end-to-end settlement time from 6 hours to 42 minutes for 2.3 million daily transactions.
- Led a team of 5 engineers through the migration; on-call pages related to settlement dropped from 14 per month to 6 per month within one quarter.
- Introduced contract testing between the settlement and ledger services, cutting cross-team integration bugs reported in QA from 22 to 3 per release.

Senior Software Engineer, Cedar River Logistics -- 2017 to 2021

- Built the routing optimization service that reduced average delivery route distance by 18% across 400 daily routes, saving roughly \$310,000 per year in fuel.
- Owned the on-call rotation for the routing platform for 3 years with 99.95% uptime measured against an internal SLA.
- Mentored 4 junior engineers, two of whom were promoted to mid-level within 18 months.

Software Engineer, Fairview Analytics -- 2015 to 2017

- Rebuilt the reporting service's query layer, cutting median dashboard load time from 4.2 seconds to 900 milliseconds for the top 50 customer accounts.

Education

B.S. Computer Science, Riverton State University -- 2015

Skills

Python, Go, Kafka, PostgreSQL, AWS, distributed systems design, incident response
